

MENTOR

Leisure activities are important for fostering quality mentoring relationships.
Examine cybersecurity's impact on society through community resources.

There are many places where you can see state-of-the-art technology; all of which are touched by cybersecurity. Whether it's a local museum or business security operations center (SOC), data center or research lab, all are great options to learn how cybersecurity impacts society. Here are some potential informal activities to get you started. All should connect with cybersecurity.

Activity	Done It!	Activity	Done It!
Watch and/or discuss TV clips related to cybersecurity. What's accurate and what's not.		Play charades around cybersecurity career topics	
Make a list of cybersecurity related job titles		Explore the National Initiative for Cybersecurity Education Framework Work Roles	
Explore what cybersecurity work roles are in highest need in your area via Cyberseek.org		Play Pictionary around cybersecurity career topics	
Share and discuss an interesting article		Share and discuss a current events news item and connect to types of cybersecurity work	
Visit a local museum		Take a virtual tour of a cybersecurity related exhibit
